should occur after the sprint review and retrospective from the previous sprint so that any output from those discussions can be considered when planning for the new sprint. It does not have to occur immediately after those other two events.

Sprint Planning | Agile Alliance

Agile planning like other types of planning needs estimating and measuring tools and methods to stay alive. However in spite of the fact that a lot of the general estimating and measuring rules and tools which are used in ordinary (non-agile) projects can be applied to agile projects (with some modifications to its style), its implications can vary and its implementations are different.

III Course: Agile Estimating And Sprint Planning

Sprint Planning is time-boxed to a maximum of 8 hours for a one-month Sprint. This meeting is for your team's members to plan Items with which they are confident. This way, they can
