Undoubtedly the global recession will bite deeply, and global trade is a significant driver of air cargo fortunes. But pent-up demand is expected to balance this dip, at least initially. This spike in consumer retail could be particularly beneficial to air cargo as maritime cargo struggles to react quickly enough to market movements.

Overcoming every obstacle: Air cargo's value | Airlines.

For the year, IATA projects air cargo demand to be 11.5% less than in 2019 versus a 66% drop in passenger volumes, but the year-over-year difference in cargo is narrowing each month. Cargo throughput, currently where it was four years ago, could reach 2019 parity in the first quarter of 2021, while passenger traffic is expected to still be 50% below last year, the air transport group said ...
