Despite its lack of scientific acceptance, HIV/AIDS denialism has had a significant political impact, especially in South Africa under the presidency of Thabo Mbeki. Scientists and physicians have raised alarm at the human cost of HIV/AIDS denialism, which discourages HIV-positive people from using proven treatments.

HIV/AIDS denialism - Wikipedia
In Sub-Saharan Africa there has been a significant, but very different denialist movement, mostly from political leaders such as Thabo Mbeki of South Africa, where AIDS has been referred to as an "Africaner Invention to Deprive us of Sex." Much of the denial rested on work of people like Duesberg, and allowed governments to avoid addressing the main issues of HIV prevention and treatment.

HIV/AIDS denialism - RationalWiki
AIDS denialism is the denial that the human immunodeficiency virus (HIV) is the cause of acquired immune deficiency syndrome (AIDS). AIDS denialism has been described as being "among the most vocal anti-science denial movements".

AIDS denialism, in the United States at least, emerged in at least the early 1990s, at a time of genuine uncertainty about human immunodeficiency virus and the causes of AIDS. But even as the scientific evidence became clearer and treatments more effective, the notion that the disease is an elaborate hoax has persisted in some corners.

AIDS activists and researchers argued for years that the negligent HIV/AIDS policies of former South African President Thabo Mbeki were causing a massive, unconscionable loss of human life. Now, thanks to the doctoral thesis of a student at the Harvard School of Public Health (HSPH), they know the full extent of the damage.

The opening chapters introduce the roots of AIDS denialism by tracing its links to three major sources: the normalization of democratic discourse--i.e., South Africa's transition from a pariah state to open-minded participant in global debates over equitable development and public health; Mheki's keen interest in "AIDS dissidents" like Dr.

AIDS Denialism | definition of AIDS Denialism by Medical ...
Those were the years of AIDS denialism, when the President of the Republic, Thabo Mbeki, rejected mainstream views about HIV/AIDS, denying that the human immunodeficiency virus caused the disease and that antiretroviral therapy, saving lives around the rest of the world, was akin to poison.
